

CUSTOMER TESTIMONIALS

Excellent Product

"I believe this product to be excellent; and I have been recommending it to every interested party. I am currently blocking 70% of our incoming email by a combination of all the methods available in ORFEE "

John M. Knapp, IT Manager, Hunt Leibert Chester - Jacobson, P.C.,

Amazing

"The Microsoft IMF filter does a fair job but we were still receiving 20 to 30 spam per day per user. Now, I literally get none. ZERO! In two months I have not heard of any false positives either. AMAZING!"

Dale Rumer, President, Creative Software Services, Inc.

Easy to install, upgrade

"We have been a customer now for over a year and the ORF program has given faith back into our email server. ORF was easy to install and even easier to perform upgrades. We noticed no performance hits on the email server after installation either!

Best of all, the price of ORF Enterprise Edition is simply unbeatable compared to other competitors solutions that costs hundreds if not thousands more! Keep up the great work and kudos for releasing such a fantastic program!"

James Lee, Network Administrator, Oncotech Inc.

Made me a hero

"You have made me a hero around the office for getting rid of unwanted Spam. Ive had more than one pat on the back for a job well done."

O. Jay Schlatter, Technology Director, Goodwill Industries of Michiana, Inc.

Bullet Proof

"Your product is as close to bullet proof as I have ever seen. My install of ORF has been running for over 6 months without a reboot or modification and is still doing exactly what is expected. When I consider that we have processed 37 million pieces of mail without a single user complaint or whitelist request in that time, I cant help but be impressed! Add to that the outstanding customer support/service and you get the best anti-spam solution on the market hands down."

Brett Larson, MCSE MCT CSSA, Lighthouse Consulting Inc, Seattle WA

Extremely satisfied

We are extremely satisfied with ORF. It is comprehensive, effective, easy to configure, and reliable.

Per G Jensen, Manu Web Solutions, Norway

Best purchase

"I have to say that Vamsofts Open Relay Filter was one of the best purchases that Ive made for my network. You guys are really on top of things. Great job."

Michael Wild, I.T. Manager, Diversified Manufacturing, Inc.,

Just the right combination

"Being a network administrator for several cities and businesses, I was testing many different products to find the right one. I understood exactly what I wanted a product to do but nobody offered just the right combination of spam checking tests. That is until I stumbled across Vamsoft in a forum on the web. Everywhere I read about ORF, the users were delighted. Now, so am I."

Dale Rumer, President, Creative Software Services, Inc.

Great software

"Just wanted to say THANKS for this great software. Best couple hundred bucks weve spent, hands down. We have over 150GB of email and about 150 Exchange users. We get less spam now than we did with a 3rd party spam filter."

Jim Gantes, Technology Director, Synergy Pacific Management, LLC.

Light weight and efficient

"I love the light-weight design and efficient performance of ORF. I chose your software because I didnt want a bloated program with a giant footprint that might jeopardize the stability and/or reliability of my Exchange server. ORF is lean and mean - like good software should be - and its so remarkably effective. I wish I would have discovered ORF years ago."

Robb Franklin, Network Engineer, Springfield Utility Board

Clean and intuitive

"This programs design and operation is excellent. Not only is the interface very clean and intuitive, the documentation is also very clear and easy to understand. It is clear that you have spent a lot of time putting this together, and you have done an excellent job."

Paul Songer, Seattle, Washington (USA),
